

# RGPC UPS 3000 EV

## European Version

AC Uninterruptible Power System  
Built to RGPC Renowned  
Highest Standards

The UPS3000 EV is a Feature-filled Uninterruptible Power System designed to provide reliable AV Grade Back Up Power to critical AV components and Home Automation systems, avoiding all associated problems with AC Power interruptions.

Best coupled with RGPC Power Delivery Models.

Green Units (Battery and Recycling)

### Features & Benefits

- Back up power for Critical AV equipment, projectors, Modems, computers, Switches, Controllers, security systems.
- Maximum Battery Life and Performance
- Multiple Communications Capability
- Automatic Voltage Monitoring and Regulation
- Intuitive Software interface
- Compact & Multi Form Factor design, Rack, Tower or Wall Mountable
- Short Circuit & Overload Protection
- Real – time UPS operational status LED indicators
- Remote AC Power Management and Control
- Low Noise & Less Power Consumption, *Smart Fan* speed control
- RoHS Compliant

### UPS 3000

440 x 520 x 131 mm (17.3 x 20.5 x 5.2 inches)

26 Kg (57.3 lbs)

Stand alone /Tower or Rack mounting

Detachable 1.8 m (6 ft)

(4) IEC C13 + (1) IEC C19

230 VAC -50% to + 28%, Single Phase Grounded

± 2 % of rated Input Voltage

50/60 HZ ± 0.2 %

3000VA/2400W

On-Line/Double-Conversion

Automatic Shutdown/150% for 30 sec; 200% for 300 ms

RS-232 Bi-direction port, and RS-232 to USB connectivity

CE, EN/IEC 62040-2, EN.IEC 62040-1-1, RoHS Compliant

RS232, Software, Cable, Mounting Brackets, Owner's Manual, Input Cord

Full Load 7 min / Half 18 min.

Sealed, Maintenance-free (6) 12V 9AH/72V

Less than 4 hours (to 90% of full capacity)

0 – 40° C

2 Years Electronics and batteries

Batteries and Unit will be recycled by RGPC \*contact customer service for details\*
